INTERNATIONAL PRELIMINARY EXAMINATION REPORT

(PCT Article 36 and Rule 70)

Applicant's or agent's file reference	FOR FURTHER ACTION See Notification of Transmittal of International Preliminary Examination Report (Form PCT/IPEA/416)	
International application No. PCT/RU2003/000157	International filing date (day/month/year) 14 April 2003 (14.04.2003)	Priority date (day/month/year) 16 April 2002 (16.04.2002)
International Patent Classification (IPC) or national classification and IPC B64C 11/46, 27/08		
Applicant OBSHESTVO S OGRANICHENNOI OTVETSTVENNOSTYU "MIDERA-K"		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 3 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of _____ sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand 11 November 2003 (11.11.2003)	Date of completion of this report 29 April 2004 (29.04.2004)
Name and mailing address of the IPEA/RU	Authorized officer
Facsimile No.	Telephone No.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/RU2003/000157

I. Basis of the report

1. With regard to the elements of the international application:*

- ☒ the international application as originally filed
- ☐ the description:
pages _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____
- ☐ the claims:
pages _____, as originally filed
pages _____, as amended (together with any statement under Article 19
pages _____, filed with the demand
pages _____, filed with the letter of _____
- ☐ the drawings:
pages _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____
- ☐ the sequence listing part of the description:
pages _____, as originally filed
pages _____, filed with the demand
pages _____, filed with the letter of _____

2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.
These elements were available or furnished to this Authority in the following language _____ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages _____
- ☐ the claims, Nos. _____
- ☐ the drawings, sheets/fig _____

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**

* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International Application No.
PCT/RU 03/00157**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims	1	YES
	Claims		NO
Inventive step (IS)	Claims	1	YES
	Claims		NO
Industrial applicability (IA)	Claims	1	YES
	Claims		NO

2. Citations and explanations

Reference is made to documents D1-D3 cited in the search report:

- D1: U. DZHONSON, "Teoriya vertoletov", book 1, M., "Mir", 1983, pages 37, 38, figure 1.6
- D2: US 3721403 A
- D3: I.S. DMITRIEV ET AL., "Sistemy upravleniya odnovintovykh vertoletov", M., "Mashinostroenie", 1969, pages 53-54, figures 2.16, 2.17

A method is claimed for creating lifting force and horizontal thrust by means of aerodynamic surfaces.

A device is known from D2, embodying a method for creating lifting force and horizontal thrust by means of aerodynamic surfaces, that is the closest prior art to the claimed method, and includes circular motion of the aerodynamic surfaces and oscillation thereof, each aerodynamic surface, in phase with the circular motion, rotating counter thereto relative to an axis of rotation parallel to the axis of circular motion.

The claimed method differs from the known method in that each aerodynamic surface rotates with an angular velocity equal to the angular velocity of the circular motion, and oscillates relative to two mutually perpendicular axes situated respectively in two mutually

perpendicular planes intersecting along the axis of rotation of the aerodynamic surfaces, one of them passing through the axis of circular motion and the axis of rotation.

Said characterising features for ensuring an almost even distribution of aerodynamic forces over the aerodynamic surfaces, that is highly efficient in creating both a lifting force and horizontal thrust, are not found in D1 and D3 and are not obvious.

Therefore the claim meets the requirements of novelty and inventive step.

The claim meets the requirement of industrial applicability.
